

## **Nova Technologies Leverages Latest Technology to Optimize Customers' Networks**

*Leading MTSP Utilizes  
Sophisticated Change  
Management and Inventory Asset  
Software to Keep SMBs Secure,  
Efficient and Profitable*

PLYMOUTH, MN – April 30, 2024 - Nova Technologies, a leading managed technology services provider (MTSP), announced today they've unveiled new technology which will help optimize customer networks. One of the central challenges facing every small to mid-sized business (SMB) is how to keep their technology infrastructure running smoothly as they continue to grow. As organizations scale, networks typically go through a growth curve in terms of complexity. Nova Technologies has made an investment into one of the latest change management and inventory asset software technologies in order to ensure that their customer networks remain at peak performance as they ascend through these new phases of business.

With employees bringing their own devices onto a network, company devices fluctuating between being under-warranty and out-of-warranty, changing headcounts and a litany of new cloud-based apps being used to keep the company productive, organizations are often quickly overwhelmed by the staggering complexity of all those various factors. Nova Technologies has taken a leadership position by

investing in technology that ensures accurate, immediate insight across the IT technology stack and highlights what changes were made across all systems at any time. Comprehensive documentation included in this technology holds third-party vendors accountable and can do wonders to preserve critical customer relationships, reduce liability, etc.

Pete Jones, Owner/President of Nova Technologies stated, "Businesses can only grow as fast as their network can perform. Nova Technologies thoroughly monitors our customers' infrastructure, hardware and software assets, and any changes that may occur because of employee interaction with their network. We know immediately who at a company administered a change and how it contributed to the overall functionality of the rest of its IT systems, in real-time. Through a significant investment in the latest state of change management and inventory management technology, Nova Technologies is elevating industry standards. This technology is indispensable for ensuring that the devices our customers rely on are constantly performing at their maximum potential. If I were an SMB, I would be suspect of working with any managed services provider that wasn't leveraging this type of technology or providing this level of insight."

### **ABOUT NOVA TECHNOLOGIES**
